

RAGHUL G

7502289812 | raghul.g24m@iimranchi.ac.in | LinkedIn | Portfolio | GitHub

SUMMARY

AI/ML Product Engineer with 5 years of engineering experience building and deploying agentic AI systems, RAG pipelines, and LLM-based applications on GCP using Vertex AI and Gemini. Skilled in designing scalable multi-agent workflows, MCP-based orchestration layers, and production-grade retrieval systems handling 1,000+ daily API calls at 99.5% uptime.

MBA Gold Medalist from IIM Ranchi (Rank 4, Top 5%) with strong engineering background and proven expertise in developing AI-driven products across B2B and B2C domains.

Entrepreneurial builder with a track record of shipping GenAI products from 0 to 1, scaling to 2,000+ users, with expertise spanning product strategy, GTM execution, and UX design.

EDUCATION

Indian Institute of Management (IIM), Ranchi	2024 – 2026
MBA, Marketing & Strategy, CGPA: 8.51/10 Gold Medallist + Director's Merit List – Top 5%, Rank 4	Ranchi, Jharkhand
Dr. Mahalingam College of Engineering, Anna University	2015 – 2019
B.E. Mechanical Engineering, CGPA: 9.12/10 First Class with Distinction	Coimbatore, TN

AI PROFICIENCIES

AI/ML: GenAI, LLMs, Prompt Engineering, Agentic AI, RAG Systems, OpenAI API, Automation Workflows, LangChain, Langgraph.

- Applied GenAI and Large Language Models to design intelligent workflows, automate product tasks, & enhance decision-making.
- Built Retrieval-Augmented Generation (RAG) systems for contextual search, knowledge retrieval, & AI-powered chatbot solutions.
- Integrated AI APIs like OpenAI API with applications to enable conversational interfaces and data-driven insights.
- Built multi-agent orchestration systems using LangGraph and LangChain including routing pipelines, persona classification, stateful graph-based workflows, and MCP-native tool dispatch for enterprise AI products. Utilized vector databases and embeddings for semantic search and improved information retrieval accuracy.

PROFESSIONAL EXPERIENCE

AI ML Engineer Programming.com Bangalore	April 2026 – Present
• Architected MCP Gateway using FastAPI and BM25-based tool cataloging, routing enterprise user queries via a 3-step Gemini pipeline (intent distillation, tool invocation, response synthesis) across 10+ agentic workflows • Engineered RAG pipelines on GCP retrieving 1,000+ documents with source-linked contextual answers, boosting enterprise knowledge base query accuracy by 60% • Deployed autonomous multi-agent pipelines on Vertex AI and Gemini LLM for complex multi-step enterprise query resolution, handling 1,000+ daily API calls at 99.5% uptime. • Partnered with 5+ cross-functional teams to integrate MCP servers, LangGraph router agents, and retrieval layers, driving a 35% reduction in manual support load	
Founder & Head of Product (6 Months) CircleBack Remote	Oct 2025 – March 2026
• Architected and shipped a GenAI-powered campus marketplace (0 to 1) on Next.js, Supabase, and PostgreSQL, scaling to 2,000+ active users across all IIM campuses within 6 months • Designed LLM-assisted listing generation workflows using generative AI prompts, reducing seller onboarding friction and improving listing creation speed across the platform • Ran 3+ AI product experiments including embedding-style semantic search, conversational discovery assistant, and AI-generated descriptions to iteratively improve platform relevance • Drove GTM strategy, user acquisition funnels, and PRD iteration cycles across campus cohorts, managing backlog and sprint releases to sustain consistent user growth	
Senior Design and development Engineer (5 Years) Valeo India Pvt. Ltd. Chennai	May 2019 – Jun 2024
• Developed end-to-end ML pipelines for churn, conversion, and CLV prediction using XGBoost, Random Forest, and Logistic Regression, achieving AUC 0.92 on conversion, AUC 0.86 on churn, and R^2 0.78 on CLV • Deployed Streamlit-based CRM intelligence and lead scoring dashboards for Valeo Japan and Valeo France, processing real-time sales lifecycle signals across 500+ customer records • Engineered Customer Engagement Score (CES) and composite revenue scoring system using cohort analysis and segmentation logic on synthetic datasets of 1,000+ records • Automated manual engineering workflows using CATIA VBA scripting, cutting operational costs by €10K annually and reducing process turnaround by 80%	

- Directed product lifecycle of 3 automotive HVAC products across 6+ countries, aligning cross-functional and global supplier teams from design through production
- Filed an internal innovation patent; earned Employee of the Month recognition twice alongside Zero Defect and Team Excellence Awards.

FREELANCE EXPERIENCE

Founder & Full-Stack Product Lead (60 Months) | RG Pro Tech

2018 – 2024

- Independently sourced and delivered 2 full-stack mobile apps (B2B & B2C) from concept to launch, reaching 5K+ active users.
- Delivered 15+ client projects with 100% on-time delivery and zero quality escalations, spanning web products, mobile apps, and digital systems across global clients
- Led 7-member cross-functional team delivering web and mobile products, aligning product vision & execution with client needs.
- Deployed and maintained AWS cloud infrastructure with CI/CD pipelines, ensuring scalable and reliable production environments across all client engagements
- Executed AI-assisted digital marketing campaigns using Meta Ads and generative AI creatives, achieving 91,000+ impressions and CPC of 1.18 across targeted campaigns

SUMMER INTERNSHIP (IIM)

Product Manager (2 Months) | Kimpex Flow Pvt. Ltd. | Delhi

Apr 2025 – May 2025

- Engineered a RAG-based internal knowledge chatbot using company documents and Qdrant vector database, enabling instant document retrieval and reducing manual query resolution time by 60%.
- Optimized prompt engineering workflows for the RAG chatbot, reducing hallucination rate from 30% to under 8% across a 50-question domain-specific evaluation set.
- Owned full B2B website redesign from discovery to launch, driving 41% improvement in page engagement, 17% increase in qualified leads, and Google Ads CTR of 8.43% through UX, IA, and product iteration

PROJECTS

Portfolio AI Chatbot | OpenAI, RAG, Embeddings, Python

Architected a production RAG pipeline using OpenAI embeddings and Qdrant vector database, iterating on chunk size (150 tokens), overlap (20 tokens), and retrieval depth (top-k: 5) to reduce hallucination rate from 30% to under 8% on a 50-question manual eval. Built FastAPI backend with prompt assembly, retrieval flow, and 4-turn chat history support for follow-up coherence while maintaining prompt size control

Implemented admin override layer and query logging for observability, enabling fast knowledge updates through file edits and reindexing without retraining

Digital Leave Management System | Google Apps Script, Mobile-First

Shipped mobile-first leave product at IIM Ranchi, achieved 100% adoption across 980+ students cutting process turnaround by 95% Engineered date validation, multi-level approval routing (SEDC and Main Gate Security), real-time status notifications, audit logging, and role-based access controls end-to-end

AI-Driven B2B Lead Scoring & CLV Prediction | Python, XGBoost, Scikit-learn, Streamlit

Created an AI-driven lead scoring system combining conversion probability, churn risk, & CLV into a single revenue metric (0.92 AUC) Deployed an interactive Streamlit dashboard enabling real-time lead prioritization, pipeline segmentation, and one-click export for sales reporting

ACHIEVEMENTS AND LEADERSHIP

- **National Winner** – TVS RiDE 2025 (TVSM - Product Strategy Challenge) | National Finalist, AI-Led transformation Challenge, IIMB
- **Overall & Tech Track Winner** – MSME Conclave, IIM Ranchi – 2025 | **National Winner** – GTM strategy competition by IIT Jammu
- **Senior Club Executive Member**, Consulting Club of IIM Ranchi | 2x Coordinating member of Rush – Flagship fest of IIM Ranchi
- Recognized **2x** as Employee of the Month 2024 | Filed an internal innovation patent (IDM), Valeo India Pvt. Ltd., Chennai.

CERTIFICATIONS

- Agile Software Development, Scrum for Developers | Digital Transformation – Project Management Institute (PMI), 2024.
- Career Essentials in Generative AI – Microsoft & LinkedIn, 2024 | Prompt Engineering for ChatGPT – Vanderbilt University, 2025

TECHNICAL SKILLS

AI/ML: GenAI, LLMs, Prompt Engineering, Agentic AI, RAG Systems, MCP (Model Context Protocol), LangGraph, LangChain, OpenAI API, Vertex AI, Gemini, Embeddings, Vector Search, FastAPI, XGBoost, Scikit-learn, Pandas, NumPy, Streamlit, Model Evaluation.

Cloud & DevOps: Google Cloud Platform (GCP), AWS, Git, Bitbucket, Ansible, CI/CD, REST API, Docker, Kubernetes

Product: Product Strategy, Roadmapping, GTM, User Research, Agile/Scrum, Wireframing, IA, Backlog, PRD, FRD, Lovable, Replit

Tech: Python, React, Node.js, SQL, MongoDB, Vector Databases (Qdrant), Firebase, Supabase, Vercel

Analytics: Google Analytics (GA4), Google Ads, Meta Ads, Tableau, Advanced Excel, Cohort Analysis, Funnel Analysis, A/B Testing
